

ALFIE GREEN: A STRANGE NEW PLANT

Alfie has discovered many unusual plants in Arcania. They are often similar to plants we have here in our own world but don't be fooled – some of them have very strange characteristics indeed!

Write a description of a new plant that Alfie has discovered. Give it a name and explain what type of soil it likes and what kind of weather conditions it prefers.

Explain any strange characteristics the new plant has as well as describing what it looks like. Will your plant be friendly or dangerous? Try to give as much detail as you can

Use the box to the side to draw a picture of what you think the plant will look like and write your description in the box below. Don't forget to give the new plant a name.
