

# Make your own music!

Fill milk bottles with different amounts of water. Tap them with a stick and hear the notes they make!

Jiggle a straw up and down for great scritch sounds!

Stretch rubber bands around a bread tin or similar. Tighter bands give higher notes.

Clatter two spoons back to back – it's great fun!

Trap a long blade of grass between your thumbs. Blow and make a squeak! Be careful – grass can cut!

Blow across the top of a bottle to make a low note.
